PROFESSIONAL SUMMARY

Ruby on Rails Developer with 3+ years of production experience building REST APIs, backend architecture, and high-performance applications for enterprise clients in the UK, US healthcare, and entertainment. Strong in PostgreSQL/MySQL query optimization, Sidekiq background processing, RSpec testing, and debugging production issues. Led Rails 6 to 7 upgrades and built pipelines processing 100K+ records/day. Author of the open-source pretty_irb RubyGem (1K+ downloads). Open to on-site work in Indore.

TECHNICAL SKILLS

Ruby on Rails: Ruby, Rails 6/7, Rails API, REST APIs, ActiveRecord, Service Objects, Form Objects, ActionCable, Sidekiq, Zeitwerk
APIs & Backend Architecture: RESTful API design, third-party integrations (CRM, Stripe), webhooks, authorization, idempotent jobs, retry and fallback logic
Databases & Performance: PostgreSQL, MySQL, Redis, indexing, EXPLAIN ANALYZE, query optimization, N+1 elimination, performance tuning
Testing & Debugging: RSpec, FactoryBot, Capybara, WebMock, TDD, RuboCop, production debugging, CloudWatch
Frontend, Cloud & DevOps: JavaScript, TypeScript, React, Hotwire, ERB, Angular, AWS (EC2, S3, CloudWatch), Docker, Capistrano, Nginx, GitHub Actions, CI/CD
AI Integration: OpenAI, Groq, prompt engineering, LLM streaming, function-calling, Python, Cursor, Claude Code

PROFESSIONAL EXPERIENCE

Shadbox Infosystem | Full-Stack Developer, Ruby on Rails

Dec 2023 – Nov 2026

Select Car Leasing (UK): Vehicle Leasing Platform | *Rails 7, ERB, React, PostgreSQL*
- Led a zero-downtime Rails 6 to 7 upgrade: resolved 80+ gem deprecations, migrated to Zeitwerk, modernized ActiveRecord patterns.
- Re-engineered search, filtering, and lead-flow APIs; removed N+1 queries and added indexes, lifting sales conversion.
- Integrated leasing and CRM APIs with retries and Sidekiq fallbacks, cutting failed lead syncs from ~12% to under 1%; ERB + React redesign raised engagement 35%.

Labcorp (US): Medical Management Platform | *Rails, Angular, Sidekiq, PostgreSQL, AWS*
- Optimized slow PostgreSQL queries (EXPLAIN ANALYZE, partial indexes), reducing P1 production incidents by ~40% QoQ.
- Designed Sidekiq pipelines processing 100K+ daily records with idempotent retries, dead-letter handling, and CloudWatch reporting.
- Hardened API authorization; raised RSpec coverage from 62% to 88%; cut per-case processing time by 28%.

FilmConnx: Film Industry Job Marketplace | *Rails 6/7, Capistrano, GitHub Actions*
- Owned the end-to-end Rails 6 to 7 upgrade: 90+ gems, callback refactoring, and a Capistrano zero-downtime deployment.
- Refactored crew-matching and job-posting workflows into service and form objects, lifting match success rate by 20%.
- Wrote RSpec suites (unit, request, job) and set up GitHub Actions CI with a RuboCop gate; built Sidekiq workers for a cross-database migration, improving data integrity and reliability by 30%.

FEATURED PROJECTS

AscendAI: AI-Powered SaaS Platform | *Rails 7, OpenAI, Groq, Sidekiq, ActionCable, Stripe, AWS*
- Built a multi-tenant Rails 7 SaaS with a streaming LLM pipeline (Sidekiq + ActionCable) at under 300 ms first-token latency; OpenAI/Groq provider fallback kept uptime above 99.5%.
- Implemented Stripe billing (free, pro, team) with webhook-driven entitlements, proration, and tested cancellation.

SaaS Digital Visiting Card & Dynamic QR Generator | *Rails 8.1, PostgreSQL, Hotwire, Tailwind CSS, rqrcode, wicked_pdf*
- Architected and built a multi-tenant SaaS platform where professionals create, customize, and manage digital visiting cards with instant live preview.
- Implemented server-side dynamic QR generation (rqrcode) linking to mobile-optimized vCard profiles, and a print-ready PDF export (wicked_pdf) for custom rectangular card layouts.
- Configured environment-based URL routing (ENV['BASE_URL']) for local-to-cloud deployment (Render/Fly.io) without hardcoded link errors.

pretty_irb: Open-Source RubyGem | *Ruby, RubyGems.org*
- Published a RubyGem (1K+ downloads) that adds syntax highlighting and cleaner pretty-printed output to the IRB console.

EDUCATION

Bachelor of Science in Computer Science | Nagpur University | DSA, DBMS, C++, SQL, Python

CERTIFICATIONS

Ruby (TestDome) • SQL (TestDome) • IBM DevOps (Coursera) • Prompt Engineering (LinkedIn Learning)
